Interactive Learning Environment for Global Communication

研究の概要

Research into the following aspects of English as a Foreign Language teaching:

- * design and implementation of EAP course to prepare students for Academic English classes during Study Abroad Program
- * practical application of pedagogical theory in development of classroom materials and activities
- * increasing student engagement in class through interactive teaching methods and collaborative learning
- * increasing student performance through raising student awareness of extracurricular, whole-life influences

研究の詳細

研究・技術のプロセス 研究事例 研究成果 使用用途・応用例 今後の展開

- * designed comprehensive 18 month course with common syllabus and common assessment standards across all classes and levels
- * implemented standardized grading rubric, assessment tasks and exams for all skills tests, common to all EAP classes
- * instituted Teacher Information Booklet (EAP staff handbook) comprising all materials and information on EAP course and culture, including testing rubrics, course culture expectations, assessment requirements, lesson plans, and teaching materials for classes, to ensure totally consistent course content and quality among all teachers
- * instituted class-specific autonomous learning tool for all students containing details of all class assessment (including rubrics), supplementary materials and glossaries, and study / revision materials for classes (common to all classes / teachers)
- * published articles on course development, autonomous learning tools, collaborative learning techniques

FUTURE:

- * New EAP course format for 2023, requiring revolution of design to implement fast-track SAP preparation and intensive English classes for high level students and suitable course for lower-level students.
- * Further research on use of Freshman Student Handbook for KTU students to assist new students in acclimating to tertiary study life (focus on personal development of life skills including time-management, goal-setting, self-reflection, effective study habits, health and fitness in independent non-family living, etc.

産学官連携先に向けた アピールポイント

- ・ Practical development of interactive and supportive teaching and learning environment, instituting global-style methods for language acquisition, and internationally consistent education and assessment standards.
